three.js Navigation Demo

https://imranabash.github.io/threejsNavDemo/
September 2018
This site is a work in progress of sorts. It is simply a fun little
idea I had to make a navigation element
using the three.js library. The purpose of this project was to
explore the three.js library and work with
3D elements.
Tools I used:
- HTML
- CSS
- SASS
- javaScript
- Three.js
- ThreexDomEvents
- Bootstrap
- jQuery
